EDUCATION

Carnegie Mellon University, H. John Heinz III College

Master of Science: Public Policy and Management, Data Analysis Track

May 2027

GPA: 3.92/4.00

Courses: Advanced Business Analytics, Database Management, Statistics & Modeling, Artificial Intelligence, Econometrics, Management Science, Technology Policy, Strategic Presentation Skills

Beijing Sports University

Bachelor of Science: Exercise Rehabilitation (Physiotherapy Track), Minor in Sports English

Jun 2023

GPA: 3.94/4.00

WORK EXPERIENCE

Thiele Law PLLC

Data Analyst Intern

Pittsburgh, PA

Oct 2025 - Present

- Managed HubSpot CRM database with 3500+ leads, integrating Mailchimp for targeted email campaigns that achieved 18% open rate; conducted data cleaning, segmentation, and lead scoring to optimize client acquisition funnel.
- Conducted market research on legal directory platforms (Avvo, FindLaw, Justia) and analyzed 10+ competitor consultation models; developed organic growth strategy recommendations covering local SEO, Google Business Profile optimization, and content marketing with projected 21% traffic growth.
- Developed an AI-powered CRM analytics agent integrating HubSpot API and Claude API; automated weekly data extraction, trend analysis, and business report generation, reducing manual reporting time by ~3 hours/week.

Illuminera Marketing Strategy Consulting (an IQVIA business)

Consulting Intern, Growth X

Shanghai, China

Dec 2024 - June 2025

- Analyzed customer engagement data for a brand-marketing project and delivered data-driven insights and strategic recommendations, contributing to a projected 15% increase in engagement for a major consumer goods client.
- Automated social-media data extraction (e.g., Chanmama) and conducted statistical analysis using Python, uncovering a high-value consumer segment responsible for 30% of the client's revenue.
- Conducted secondary research using corporate filings (10-K/20-F) and industry reports, co-authoring 4 market-trend papers with senior consultants; led 10+ expert interviews and generated insights that shaped project strategy.

MSH China

Business Development Manager (Full-Time)

Shanghai, China

Sep 2023 - Nov 2024

- Developed and analyzed sales KPIs, exceeding annual targets by 239% and generating over \$1M in new business through strategic client acquisition and data-driven market positioning.
- Managed a global portfolio of 2,000+ high-net-worth and corporate clients, delivering tailored medical insurance solutions to support retention and revenue growth, leveraging comprehensive knowledge of China's tiered healthcare network and provider landscape.
- Led the end-to-end design of a customized corporate insurance plan for an enterprise with 50K+ employees, partnering with actuarial teams on risk assessment, pricing, and product structuring.

ACADEMIC PROJECT

Energy Data Analysis: U.S. Trends and Pennsylvania's Transition

Oct - Dec 2025

- Engineered a comprehensive energy dataset by collecting, cleaning, and merging 100K+ records from EIA-860, EPA eGRID, and CDC sources using Python; built aggregation pipelines to transform generator-level data into plant- and county-level features with full geolocation validation and FIPS-based standardization.
- Conducted spatial and statistical analysis (geopandas, t-tests, Cohen's d) examining relationships between power plant proximity, PM2.5 emissions, and health outcomes; developed visualizations (folium maps, seaborn treemaps) to illustrate capacity trends, fuel mix evolution, and pollution patterns in a 60+ page analytical report.

Hybrid RAG Pipeline for Domain-Specific Question Answering

Jan - Mar 2026

- Built an end-to-end Retrieval-Augmented Generation (RAG) system combining BM25 sparse retrieval and FAISS dense vector search into a hybrid pipeline, deployed on AWS EC2; achieved 95% retrieval accuracy on a domain-specific Pittsburgh/CMU QA benchmark.
- Fine-tuned retrieval ranking and integrated Qwen2.5-3B-Instruct as the generative backbone; implemented chunking strategies, embedding optimization, and re-ranking to improve answer faithfulness and reduce hallucination.
- Designed an automated evaluation framework to benchmark retrieval precision, recall, and end-to-end answer quality; documented system architecture and trade-offs in a technical report covering pipeline design, ablation results, and deployment considerations.

SKILLS

Technical: Python (Pandas, NumPy, Scikit-learn), SQL, MongoDB, SPSS, Tableau, Power BI, Google Analytics, ThinkCell, Natural Language Processing(LLM, RAG, LangChain, AI Agent), CRM system(Hubspot, Mailchimp)

Methodologies: Data Cleaning, Data Visualization, Statistical Modeling, Machine Learning, MC Stimulation, Multi-Criteria Decision Making

Certifications: CFA Sustainable Investing(ESG), AHA Heartsaver® First Aid CPR AED(Instructor Certified)

Languages: Mandarin (Native), Shanghaiese (Native), French (Basic), Japanese (Basic), Cantonese (Basic)
